

PRINCIPLES OF PROSPERITY

- Prosperity is natural. It is your birthright. You are hardwired to prosper. Your creative ideas and desires are natural inspirations designed to bless you and your world.
- The source of all supply is Spirit. Spirit is the infinite Source of your prosperity, not your job, investments, trust fund, family, or your skills and credentials. These are all effects, not cause.
- Cash follows creativity, not craving. You are here to express your God-given creativity, and the universe always funds that expression. The more you create—ideas, products, services—the more prosperity will flow to support your efforts. The most creative people are the wealthiest because they are not afraid to live large.
- Money must circulate so it can serve its purpose in the world. When you hoard money prosperity can't find you. The universe always fills a vacuum, so a dollar leaving your wallet creates space for a hundred dollar bill.
- Unconditional acceptance is a requirement of prosperity. Unconditional acceptance means giving up the ego's judgments and resentments. They hold you prisoner to the past, and keep you in lack in order to "punish" your offenders. Forgiving and accepting frees you to prosper.
- You must love the material world. Prosperity is prevented by believing God and money are separate and by negative attitudes about wealth and money. Because Spirit is everything. Spirit is money. Money is neutral energy - neither holy nor evil.
- Consciousness creates. The thoughts and beliefs you hold in your conscious and subconscious mind create ALL of your life experience—including money. Mastery of your thoughts by building prosperity consciousness is the path to abundance.
